

Instructions for CQG Data (Updated 3/25/2025)

CQG real time data covers most futures exchanges around the world. StoneX trading system works with CQG data.

1. You need to open an account at **StoneX Futures**
<https://portal.stonex.com/prefill/index/HerbKral3112054>
2. As soon as you have opened such account, you must send an e-mail to StoneX at GFSupport@StoneX.com to request a CQG password to be setup. StoneX will send a “**Welcome to CQG**” email which you will click on link to setup your CQG password.
3. You need your username (email ID) and CQG password to use the CQG data.
4. Download and install our latest AbleTrend 8.0.
5. Open AbleTrend 8.0, and click “Data Modules”, click “Add” then choose CQG, input your username (email ID) and CQG password. Simply click “OK” (Don’t click “Test”).
6. If your username and password are correct, then you will see “Data” button turning GREEN.
7. Setup charts with CQG data: click “New Chart” icon (Icon #1), choose CQG data module. Input futures symbol, time interval... click OK
